Summary

Product Designer with fintech experience across web and mobile platforms. Simplifies complex financial journeys through interaction design, information architecture, and design systems; uses usability testing and behavioral evidence to validate and refine design decisions.

Professional Experience

Product Designer - TalaLand

Feb 2026 - Present

Sole Product Designer on a gold and precious-metals investment platform, collaborating with Product and Engineering.

- **Installments & credit:** Designed and shipped the installment gold-purchase journey, from plan selection and contract to payment and installment management; also designed the YektaPay flow and gold-backed credit experiences.
- **Wallet & payments:** Designed deposits, withdrawals, bank account management, and deposit matching, including payment statuses and error handling.
- **Home & information architecture:** Redesigned access to assets and financial services; designed portfolio views, asset details, and transaction history.
- **Marketplace:** Designed multi-vendor shopping journeys, including seller and product pages, cart, checkout, and split shipments.
- **End-to-end design:** Led end-to-end design of features such as GoldMax - from user flows and wireframes to prototypes and UI - turning a complex investment model into an intuitive experience.
- **Research & validation:** Conducted usability testing and analyzed user behavior in Microsoft Clarity to identify installment-purchase issues and inform design iterations.
- **Design system & delivery:** Extended the existing design system with components, tokens, and reusable patterns; designed the responsive web experience from scratch and partnered with Product and Engineering on constraints and handoff.
- **Portfolio & asset management:** Built TalaLand's portfolio from the ground up, defining the asset model and information architecture for gold, silver, and cash - including available and locked asset states - across all financial services.

Product Designer - Kian Tejarat

Feb 2025 - Feb 2026

- Delivered product design across five products - three gold-trading platforms, one property and accommodation product, and one e-commerce product - plus mobile experiences and responsive interfaces for 10+ retail and corporate websites.
- Translated user and business needs into briefs, wireframes, journey maps, and dedicated style guides, informed by industry benchmarking.
- Collaborated with Engineering, SEO, and Marketing on delivery; used AI to design banners and CTAs.

Sara Alimardani

Product Designer

Product Designer - Freelance

Jan 2023 - Jan 2025

- Designed web and mobile experiences for a range of independent clients.
- Reviewed comparable products to inform design decisions.
